

Business Environment AGAIN wins coveted bca 'Business Centre of the Year' award

In a world of the credit crunch and economic uncertainty for SME's there is some good news. Business Environment's business centre at No1 Olympic Way, Wembley, has proven that customer service excellence is still the key factor in the success of all SMEs by having its clients vote it the Business Centre of the Year in the bca annual awards. This is the first time in the history of the awards that any business centre operator has won this prestigious award for a second time.

The Business Centre Association's (bca) judges received hundreds of nominations from throughout the country for the prestigious award given in recognition of the highest standards of client care, professionalism and the development of a workspace environment that enhances client's networking and business opportunities.

"We are indeed privileged to have received the highest award in our industry. It clearly demonstrates that our clients recognise and appreciate the outstanding levels of support and exceptional value that our team provides," comments Sam Samaraweera, BE Wembley centre manager. "Our business is focussed on providing flexible workplace solutions for SME's and start-ups. The wide range of services and the exceptional value we provide ensures that our clients have the perfect facilities to assist in overcoming any market downturn.

"Our goal at Business Environment is to ensure our clients have a great day at the office. Judging by the large number of clients which nominated us for the award we must be achieving our goal."

"Two years ago the BE centre at Milton Keynes received the Business Centre of the Year award," comments David Saul, BE's managing director, "so for our Wembley centre to also win the award is testament to the

sheer hard work of the entire BE Team. It proves that our ongoing commitment to exceptional customer care, innovative and quality services is really appreciated and valued by our customers."

Business Environment has eleven centres currently operating, with three more due to open in 2009. In all, the company's centres provide more than 1 million sq ft of serviced office space for clients.
